

Pets Permitted

Given that Woven City functions as a test course for mobility, mobility technologies in the development stage operate in both indoor and outdoor environments.

Considering the safety of all residents and pets in Woven City, only the following pets are allowed to be kept.

- Small dogs and cats that can be kept indoors (up to two per household, and only in residential buildings where pets are permitted).
- Non-toxic and non-dangerous pets that can be kept safely indoors in containers such as insect tanks or cages.

- Animals not listed above (including birds) are not allowed.
For any questions regarding pet restrictions, please contact the Woven City Contact Center.
